

Industrial. It's dirty by nature.

Factories. Mills. Warehouses. Workplaces like these aren't known for their cleanliness. Neither are regular keyboards. Bring in Cleankeys and your keyboard becomes the cleanest piece of equipment there is.

Multi-use. It's always at work.

Most keyboards aren't used by just one person. Think schools, stores and kiosks. Colds, flus and other infections can spread out of control. Cleankeys stops the spread and puts you in control.

Home. It's full of surprises.

Somebody just spilled juice on the keyboard. Maybe it was the toddler. Maybe it was you. Use a regular keyboard? Good luck cleaning up one sticky key at a time. Cleaning with Cleankeys? Spray and wipe it clean in seconds.

The revolution starts now.

Hands down the best keyboard you'll ever own.

"This is the easiest keyboard we've ever had to clean! We save significant time and do a better job. Cleankeys is the solution we've been looking for."

— Dr. DM Stringham, DDS

Shift your expectations.

Easy to use. Used everywhere.

Using Cleankeys is simple. Just start typing. When it's time to clean, spray and wipe. Dirt and bacteria are no more.

Cleankeys makes life cleaner and easier, no matter where it's used.

Aseptic. That means clean.

No keyboard is better or faster at eliminating bacterial contamination. That's why Cleankeys is ideal for aseptic environments like dental offices or medical clinics. Infection control just got easier. A lot easier.

cleankeys®

glass top

A clean and easy choice.

Welcome to the wipeable, waterproof and wireless world of Cleankeys.

Cleankeys is the world's easiest to clean keyboard. One spray. One wipe. That's all it takes to keep dirt and bacteria off its surface.

It's the infection control solution professionals around the world have been waiting for. Cleankeys' waterproof design also means that it stands up to whatever your workplace throws at it—or on it.

The technology of touch.

Our keypad responds only when tapped, so you can rest your hands down. There's even an integrated circular track pad, so no need for a mouse. You'll feel the difference our innovative design makes in your everyday work.

While typing, you sense the slightest of ridges. Deep enough to feel. Shallow enough to wipe clean. It's practically flat—yet completely tactile.

All our technology is patent-pending—that means nothing compares.

Built for freedom. Built to last.

Cleankeys is wireless—it moves with you. It's mountable too, so it goes where you want it. And our rugged, waterproof design means it will take a lot, no matter where you take it.

You can connect Cleankeys with ease. A USB connector plugs in and detects your keyboard automatically.

Cleankeys is designed to be your keyboard for a long time. A very long time.

Truly revolutionary design.

Specifications

Keyboard

Length: 14.68 in., 373 mm
Width: 5.64 in., 143 mm
Height: .91 in., 23 mm
Weight: 2.0 lbs (0.91 kg) glass & 1.6 lbs (0.73 kg) acrylic

Material: Base – Industrial grade, reinforced ABS; Top – Scratch resistant, hardened acrylic or glass

Color: White

Mounting Options: Three #6-32 inserts spaced in a MIS-D 75 Vesa standard pattern

Wireless Receiver Size

Length: 1.89 in., 48 mm
Width: .68 in., 23 mm
Weight: 0.21 oz (6 g)

Power

Power Specifications:
AC input: 100-240V, 1A, 0-60Hz;
DC output: 5V, 1A (charging);
USB input: 5V, 150mA nominal
Wireless Receiver Power:
5V @ 22mA

Connectivity

USB Cable: 6.8 ft., 2 m
Wireless Interface: 2.4 GHz Digital Radio
Wireless Range: 30 ft., 9.14 m

Supported OS

Windows, Mac, Linux, Unix

Warranty

Two-year
